

Hello: I think the "Do Not Call" list for the State of NJ is the toughest in the nation. I fully support NJ's Do Not Call program. Why should I get any unsolicited phone calls from telemarketers while I'm trying to have dinner? Why should I have to come home to a machine with 20 calls from 15 different companies wanting to sell me a \$500 vacuum cleaner that will also microwave my pizza? If I want or need a product I'll call you!! It's that simple. It because of telemarketers why we have to pay Verizon much more money to keep our numbers out of the hands of these people who want to disturb us while we're enjoying our moments alone with our families. 9 times out of 10 they don't understand the meaning of "NO I don't want your product!!" So please leave things as is. We pay among the highest taxes and premiums for everything in the nation so I feel we should have the last say in this matter..Thank you.
